

10121

AM probe

Information

- Measuring range: 0 – 2.99 activity in g/l
- Resolution: 0.01 activity in g/l
- Calibration: factory calibration, stable
- Probe: stainless steel with special 2-pol-sensor
- Probe length: 250, 500 or 750 mm
- Connector: 8-pin plug
- Application: direct measurement of soil salinity
