

21060

Muffle Furnace**Information**

Compact, lightweight muffle furnace for many laboratory applications. The furnace has a double-walled, stainless steel plate structure for low external temperatures and high stability. The room controller is mounted in the side allows flexibility in setting and performance control.

- Furnace casing stainless, textured stainless steel sheet
- Heating from two sides
- Protected heating elements in quartz glass tubes
- Energy-saving insulation
- Supply air opening adjustable
- Low-noise high-power relay
- Adjustable heating ramp and hold time
- Integrated over-temperature monitoring
- Easy to maintain

Technical Specifications**Technical data:**

- Max. temperature 1100 °C
- Volume 6 l
- Weight 27 kg
- Electric power 2000 W
- Supply voltage 230 V
- Inner dimensions 17 x 20 x 17 cm
- Outer dimensions 390 × 435 × 465 mm

Other models on request.
